

social contract
→ when '2' people get married why we invoke state
→ to getting married → why people require A magistrate
The state
Get marry & Go home

→ why state involved ??

→ A love marriage → decided to marry → promise enough ???

* Arrange marriage → ok !! (don't know person) ⇒ so need a contract there ✓

believe love marriages

↓ signing A paper (Karthik Ande 22) why ??

→ person A person B ⇒ love ⇒ Marriage

why ques of marriage imp?

→ sociology tells "it is imp" ⇒ "it is Nothing to do with love"

it's only (about)

① → Benefits

② → Inheritance [upcoming Generations]

The inheritance itself passed onto a legal aid
only conceived through Marriage ##

→ what it preserves in society → Morality x, not in sociology

→ What this contract preserves ??

property

it preserves "patriarchy" → something ??

doubt

→ children from marriage

children outside marriage

↳ illegitimate (??)

child born

↓
no term of legitimacy

→ who added legitimacy to women's conception / conceiving?

⇒ legitimate → can be opinions

iPhone / . . .

4) in every interaction of human life for negotiations

↳ there is a social contract

There are norms

rules

follow

Rewards

↳ if not follow

punishments

Rewards: What reward we got by taking admission in IITM?

Education, BRAND,

→ society's acceptance & appreciation

Jee → not judging X

→ Hierarchy ✓ placing

Kota
Hechte ✓

→ KOTA is saying

With your own merit & own effort

→ land up here

it stating

"if you come & study with us

you will ~~place~~ place in
proper stratification"

⇒ I will make you to ⑦

Y-

⇒ It is selling "Aspirations" X - ⑥

Sociology ⇒ KOTA selling Aspirations in millions #

Hope - Alienation. (two sides of same coin)

⇒ We are trying to understand processes which are
Governed our life

is governing our life

Keep on Governing our lives ⇒ Sociology #

⇒ sociologists ⇒ Rules we follow are

Rule 1: There is Nothing that is pure enough, polluted
enough to not study #

⇒ There is nothing pure enough that it should be
study.

Because
⇒ Whatever is happening around us is part of social matrix

Birth → Socialize → Die

US
⇒ socialist → went to jail

⇒ There jails are run by "private" companies

→ food
→ punishments

Why private?

⇒ The jail labour (people in jail) taken as
free labour to factories.

⇒ The entire system of jails are like this

→ Soc asked

Response:

not food, basic needs etc.

↳ it's about "socialization" also.

① I might not get
job outside
then I will stay

⇒

→ We don't want to go out of jail Now completely

out they suggested a completely different constitution for jail
management & judicial system. #

→ demands were ① If a woman conceive a baby in jail
Then until 5th year women should be allowed
to live in society.

In India

Baby born → first five years in a jail then outside baby only #

Ohh OK!

⇒ they were asking "Civil rights".

→ There people are people without conscious & morality & think like
runaway from that place. #

→ They don't have capacity to think about better society
Refined interaction.

⇒ If a sociologist not go & investigate ⇒ Then we all will have
these same ideas.

That's why: There is nothing polluted → to not study ###
nothing - pure → to study 17-65

side:

Katherine Mayo → writes Book Mother India.

→ came to India at Gandhi time

→ why she writes Mother India? ⇒ Bharat Maata (in Hindi)

Give Independence Idea ⇒ Bharat mata

⇒ The mother land has to be protected
from white's.

White lady (ohh)

→ The corner & talks → how men's are worst
how women are dirty

→ Written as shit

She is trying to say "The Britishers should stay here for few years"

To make India Modern
To make "Discipline"

EXPORT Democracy

"She said 'Katherine is a drain. Inspector who gone into drain of microscope' means:?"

→ It means that if you are a drain inspector looking into drains & trying to say this is what the world is

Which means

When we talk about society & social group interaction what matters most is CONTEXT.

without understanding content of India's years of wars, fights across empire

because of political, religious etc

⇒ How would not account that conditions for living?

180 → 150 years back of that time

GDP of India is 200 times greater than Europe

&

→ rate, end, BNG

United India
Subcontinent

⇒ economic growth higher

but → Sati as a practice here etc

⇒ Reduction method??

means I want to arrive at one truth

→ A reductive way of thinking is "Men are better than women" in computing

→ Why is it reductive / partial??

⇒ it's reductive & partial because for centuries women doesn't get education in country

⇒ maths → all names involve men (great)

⇒ process is very complicated than that one truth

→ Well meta, ...

→ we don't want to work with text
→ we believe in open source

* This idea comes because we don't believe in reductive one logic of business

* The one reductive way of thinking might not be entire truth

EX: 3/11 → Malnourished people, (by seeing)

4/11

model
malnourished
Occasion??

5/11 → starving
fasting to death

What common in all three

⇒ All are not malnourished

All are looking malnourished

What then

⇒ All three of them part of social enquiry

1/11 ① Bengal famine

its cause

resources are diverted to the British Armed forces.

So it was cause event first was induced by humans by colonial power in history

② Paris passion week during 2000s

⇒ what happened was ⇒ models need to be fewer size ✓

it was Standard of beauty ✓

→ People has to maintain their body to walk in most prestigious walk (RAMP)

③ Ingenium - SANHALA ⇒ you stop eating & die in that process.

⇒ You see something, it doesn't mean proof

I saw this X ⇒ Not a proof

⇒ proof have to be investigated scientifically only then

I saw == I understood

* see & understanding ⇒ process of research & investigation

* Don't believe in your eyes somehow ⇒ where you need to give time for research & investigation

→ Peter Berger: The Art of Skepticism

→ somebody completely optimistic → she will be like "Everything is Good".

→ How things be good etc

Whenever ask them (Skepticism)

→ How was food → Not good

→ How is life → so bad (pessimism)

Investigation begins → ① when you are curious

② When you are unsure for with it.

→ it's not a practice, it's an attempt to understand.

② Question about the idea that
→ something is taken as granted

→ The only way people treat themselves & society was Religion

→ we changed

→ We started questioning of religion. institution of marriage

→ Book 2

When somebody dies, the family members go to the tradition place & perform & comes back & Touch Iron etc

→ cycle of life → This done → 22 days

→ not let wife back to home. Not brought back wife back to home she had to replace in pile

→ The wife should be on the pile → salt #

→ Families are not resisting when the loved ones died

→ children not resisting mother's love

→ we heard something taken as granted ideological power these have

it is better to question

(Good idea)

→ is it ultimate truth (or) is there any ultimate thinking

Give some ex contradicting etc?

Job require degree → is this ultimate truth?

→ Degree need but not only degree is enough, soft skills, #

* → Your social Network (Imp)

• family background helps

→ not just a degree

→ Hierarchy done by merit → is corrupted. X → need all but we all believe in

→ It is Good to question "What is merit"?

→ it's constructed because of convenience

→ No code good → No need degree only

→ can do from diff online sources

→ Top directors in world → Are not open to school

→ All sculptors in world → not want to learn in school

So questioning Good #

→ Whenever we are trying to investigate Sociology subject what will be scientific problem in process

→ Biasing

→ U might be very reliant on your ways of thinking

→ 2 Biasings

→ Judging other

→ I am too in my head, I will see from that way

→ Berger says → To do something like science people do

→ natural science person do → it's objective

rat, hamster → not human

→ Drop of molecule in its brain → I am looking as an objective

Its different from human/oe

→ Laptops, Architecture → its objective

because

it's not human

→ it doesn't talk back

→ it doesn't react back

→ it doesn't do anything

⇒ what u do is ⇒ REFLEXIVITY

means

⇒ You acknowledge your social posⁿ, your identity & your biases in Research as well.

Ex: I am MALE - UPPER CAST → I am studying this & I am finding these results

You will include our details, identity social posⁿ etc in research

Ex: I am researching on OLA, UBER, ZOMATO

platforms → how their interactions with these digital platforms protection

Ex: phone ban in homes

* Question is level of epic that the res (??) what happened during research will be!

→ Talk with household to know about his work
→ Was their able to give time to their family?
→ What are the duties they aren't able to do (or) able to do?

Gender probm:

Women of household doesn't speak to me.

Why? → My consider it's not women are not good models if they speak with strangers!

⇒ Even her husband takes me, to parrot??

* Speaking to women will be difficult ⇒ Ohh ok!

Ex: if i do this with coders of bangalore, hyd

In science, you have to be objective.

Here, It's to address where the subject to the element coming from.

diff persons ⇒ diff final results

⇒ The nature of answers might be different

⇒ The condⁿs of work remains same ??

* The objectivity part of it is fact that you can actually address your subjective bias

⇒ When that is taken by grp of five people ⇒ Some how reach the TRUTH

⇒ Family relatives who shut on us what we doing

* The idea, life they dealing with not enough exciting to them.

⇒ Therefore, They want to know about others life.

⇒ Ex: EXAMPLE of ESPIONAGE

Being a good spy!

work of spy → I want to know about others life

because it is political & economical significant to the country

⇒ to playdown the social individual that you are

⇒ playdown social around you but interested other

one diff ??

Consent

⇒ Espionage neighbours → No consent

Sociologists → Consent

⇒ I know about them

So, I don't ask them

No consent

Can I talk with you?

Consent

because it's what I am doing

⇒ looking behind scenes you do with but with consent

⇒ Gangleader for a day

- PhD

- sudhakar ventakesh

⇒ He says: "I am not interested in sociological questions like religion, caste, etc."

I am interested in crime, Gang wars & Gangs".

→ research on gangs

→ what makes gang

→ rules that make gang

→ why is it

→ why they create gangs?

→ marginalized people why doing?

→ What is condⁿ of living near gangs formed?

→ Unrespectful looking, because of criminals, unofficals, etc

→ How does modelling industry works?

men & women who are aspiring to become models ⇒ Drawn into sex or industry

⇒ Not only a social prob^m, It's a economic issue also

Dimensions multi

Debunk:

↳ Where we trying to question the prejudices & ideas that you feel are common sensible.

Ex: How many of you are from Delhi?

In Delhi, ⇒ Idea that these people are Always "CUSSING" & "ABUSING"

What the prob^m is? (Debunking is)

⇒ All people calling Delights are not never from Delhi

⇒ Delhi doesn't have resident population

⇒ Delhi has officially 5 lakhs only residents

Now, Same statement

Does All men "cuss" & All women "don't cuss" and is it mix of both?

→ All men cuss; women all cuss; mix

↳ It's not about Delhi people, it's age that use cuss words

⇒ even tamil use more like that

Not a feature of Delhi people

It's a feature of all that age

a lot of women are CEO's in big Companies

→ Idea of Masculinity & Women

Masculinity & men

⇒ A lot of women now are CEO's in big Companies

⇒ if interviews seen of indranil

→ if we doing a topic analysis of nip

Share talk - Business -

⇒ it's sharply different because what we find is the market forces - the companies, PR teams have made winning CEOs

⇒ Gender → effect

* your experience can't be equal to man

* my experience can't match with colleagues

⇒ Each experiences different

⇒ It's not about men (or) women; the language of CEOs is language of toxic Masculinity

→ That is expected whether u are man, women ... etc genders the language will not change.

→ That's sociological question

2nd stereotype

② Bengali's

Certain stereotypes has to be broken??

↳ love's fish

⇒ Delhi

→ love chicken butter, love punjabi songs, hate fish

⇒ Bengal → Rational movement:

↳ All people who participated in that movement generation's ago, Those doesn't touch Non-veg foods.

(huge population)

How this stereotype arises??

① It arises because Geographically it's a coastal region.

mis through culture, writings

→ The 'most' people who eat "non-veg" is more.

→ This stereotype doesn't fit everybody

⇒ As a sociologist we have to question? ohhoo

Ddhi →

Revolution: Violence

Revolution

WINS

LOOSSES

Revolution

TERRORISM

It's diff for diff people

→ Questions power / ideas

→ To Maternalize

* Revolution begins if there is a Inequality

MIND

Revolution → All went to political revolution

Industrial Revolution, Technology

It's linked with many meanings

loaded with multiple meanings

That's why it's so easy to be ABUSED

→ News channels → if talks about new systems they are

Mostly ABUSED

Because, "They do not defining context of it"

Revolution for whom?

What power they are question?

Is this transformation good for society?

When somebody sending msg, please say "this is what I mean to say"

is mother's love is love for nation same as for love for game??

love → unaccountable

Accountable also in some deeds

⇒ accountable for parents

→ pets, love is different for sons

love for research → I stood up for this meaning
E. downgrading with this

Suicides

110 suicides happened across Top 5 IIT (last 8 years) why?

→ sociologists → investigate this

⇒ same grip technologists

→ can understand the pressure of study

(because we all going through almost same)

Is same reason if you see suicides of FARMERS?

1st 2 chap

Endsem

⇒ Peter Berger:

read paper

Opinion writing

endsem

L-2:

People with mix parentage ⇒ diff neighbourhoods

white's → diff neighbourhoods

United states ⇒ WB2 boy ??

→ the 2nd

Across Geographical nature of world

Tropic of cancer

Tropic of capricorn

What rules the social is the coloured line

⇒ This means, people of different colours demarcated by boundaries of lines.

→ That lines are line of their colour

- The US congress at that point → brought about some kind of positive discrimination
- started to develop these haters?
- ⇒ All movies ⇒ Gangster Movies you see
- *** Came from idea that life in the haters house is.
- ?? → Why is it The Gangsters belong to MINORITY population?
- ⇒ That is their way to resist the diff races (all together)
- white Dominance ***
- (The Hegemonic white Dominance)
- Socialist studying ~~to~~ this ~~to~~ need to fix
- ⇒ in UK, The prime minister
- The personal advisor: Anthony who ~~was~~ was speaking about how the digital is going to change the states work.
- * In India, much difficult problem is that
- ⇒ Here The social itself caught about Social problem ^{to be a}
- Which can be fixed by MONKS, politicians without any research.
- ⇒ That has been a huge problem in country.
- ⇒ This expanding by entire south Asian countries
- Therefore, that's why so many people moving out of our country to other states.
- it's because
- certain kind of scientific impurement has not came about post Independence

- What is broadly Sociology in India right now?
- ⇒ It's all about → Interpretation of the social
- & → Reporting in Journals
- Something → picked up by policy people & work upon it.
- what is relevance? → in this slide which ⇒
- What is sociology??
- Sociology itself → it is a study of societies.
- (when you coming to do Interview (or) rank is there ex:
- Rank → it is mark that you people got)
- What is Common in All? ⇒ Aspiration to become Engineers (own)
- (or) Forced aspiration given to you by Somebody else. *
- Connects all class
- * notion of aspiration & degree from prestigious clg (IIT), Reputation.
- ⇒ You are bring here is Not an Individual question only
- it's a societal question. *
- ⇒ Engineering in AP, ES etc ⇒ Tied 230%
- ⇒ it Increased because of people's Aspirations that hope of engineering is degree that goes to give better life. *
- ∴ It's a societal question
- study of Individuals & Groups
- Understanding role of social structures, Institutions, cultures.
- ⇒ ~~Relationship~~ It is Relationship between Individuals & larger society around them (Understanding)

→ Hiccomy (Japan)
 cultural practice

⇒ people isolate themselves in room & They don't want any contact outside that room.

⇒ somebody food, grocery at door

⇒ The digital things Enabled / made this much more * (by ordering online)

⇒ Can this phenomenon be study sociologically??

Yes

but why?

⇒ people across Tokyo etc major cities, trying to practice this.

⇒ All young people (not middle age with crisis)

⇒ As a phenomenon, when so many people practicing

There might be something happening in that society and

The major problems there is: The am

* ⇒ The amount of work expected from a individual from Industries or state is huge.

⇒ people thinking that rather than failing there

→ we can sit in rooms & isolate

⇒ They don't want to be in that competitive space to compete & loose.

* → no social media also

(India ⇒ NO X why?

→ in Japan, Hiccomy as a culture

→ Tradition very rooted

⇒ Buddhism practice there

→ This is how people become monks

* ⇒ Hiccomy is a way of life for certain people who had some spiritual quest.

⇒ it's gets transformed as a way of life & in modern cities as a way of life to move out of competition *

⇒ ∴ Therefore it becomes a social problem. Question of sociology

the difference b/w social problem & Sociological problem is 1/4

⇒ social problem in India

⇒ Bhadraltra ⇒ Guy, big fancy car

Who killed three people

Drive for some time & he stuck

driver says → Three people X

Heart broken person doing all this

Last 10 years news papers

many societal problems.

How does it becomes a sociological problem?

→ You look at cars that look & hit those people

* ⇒ always, people of privilege → who think they can get away from anything

⇒ Thus comes privilege & class

⇒ Transforms itself as Sociological problem.

* ⇒ Journalists → reports on societal problem

⇒ Sociologist would say ⇒ that these privileges that allowing/enabling these kind of crimes

* What need to be done??

at school level?

marriage like Ambanbi

⇒ The privileges in the class you display out there are

Sociological concerns & not societal concerns

↑ because you are bringing from sociology * ?? (doubt)

Understanding Theorising Society:

Karl Marx → what's agenda

⇒ critic capitalism X

⇒ Understanding society in historical process

⇒ main question: What is the system that we are living in?
 & How do we understand it?

At work he did.
 was to understand
 system
 ↓
 Capitalism

→ progressive state of

Theorisation

Understanding
 &
 functioning
 of

⇒ if

Adam Smith → Capitalism ⇒ dynamic system

Neoclassical
 view

→ self-equilibrating system

But *
 market

Say ⇒ everybody dignified life

⇒ Acc to him

Market → Neutral
 self-equibr

⇒ deeply involved with
 political power & Inequality

⇒ which means all markets tending
 to monopolistic (single rule)

⇒ one company & Ohio

Marx critically
 completely

He is saying invisible hand
 taking care of market

⇒ but not

people have class privilege, own
 resources to protect it

⇒ way of theorisation

Social Computing:

→ interested in topic which is deeply social

* online Harassment

Research
 IEEE:

giving to women's organization (National
 women's
 welfare
 board)
 ⇒ take data & uses to
 modify people in good

Incentives giving
 to being good

Exterminating
 to being bad

Ex: warning system in social media ⇒ Example of computational
 Social Science

⇒ what is problem sociologically??

Subjective nature?? doubt

The moment when we Incentive somebody to behave in
 certain way

They will behave in that way &

→ but can't judge throughout his life

⇒ He can act like good in online/digital space & In
 person might still remain bad in offline

Mo case problem in India X
 Gender not problem

12% solve
 if it was easy 75 years of
 Independence
 it got fixed

⇒ Social Structures: (social Institutions)

Three things Imp:

① Practices

* ① Social Institutions:

→ A social institution is Institution like Marriage,
 institution like FAMILY
STATE (MARKET)

What is Institution?

Institution means

It is a body that might be non-existent
 physically

⇒ it is a Reiteration of RULES, NORMS & VALUES

→ going into digital & online goods to show up. we are
belong to certain class.

* ① Exercise of power & Authority

↳ Also contradictions that exist in that institutions

∴ it's a process.

Ex: 15 years ago → Hyd. what
→ rocky. **BANGARAS**

↳ ∴ Bangara hills

→ water retention level

→ No canal irrigation

Hyd → Not silicon valley

② Urbanisation / Migration

↳ links to process of globalisation & flow of capital

③ Development / Industrialisation

④ Society & Ecological change.

↳ Resistance, change & Mobility

① Mobility: → ① Geographical mobility

→ ②

Hyd → 15

Social Mobility

⇒ When transient our class position from A to B

late mobility

↳ 200 years Colonial power

→ Anticolonial movements

→ all people of all social structures participated in that

→ ~~labor~~

→ Movements, strikes

→ it called Social Movements

union of workers of swiggy
zomato
uber

Airsa munda → Thakur

(labour movement) → everywhere

Q19 workers union

⇒ Minimum wage act

→ part of movement

* Every moment → one agenda

⇒ want to change current status to better

* Sabarimala issue

→ Women can't enter the temple

→ doesn't want to go see women by god

→ other temples you go why?

as temple entry

God in god

⇒ it's the God's choice → God itself taken judicial subject

Social movements

Contradiction

change ⇒ is for against the state of scope.

Resistance ⇒

↳ can't say what is better (or) what is not better

⇒ State of scope needs to be change

* Friendship

Online friendship

(vs)

In-person friendship

social movement
socialists
reads

5-Mem friends

post ⇒ male friends → Nasty things in comment

very measured shown on internet

very limited

because Surveillance done by community of people

⇒ Other friends regulating behavior of them

themselves regulating

⇒ Friendship online very diff than In-person

⇒ Upset → "written something"

→ don't want to do

There is Specific & General → community in friendship in urban male

that act → friendship

Then is diff b/w NS & Social science

framework → Positivism ⇒ Result found in Hyd through Empirical exp is can replicable in Antarctica with

⇒ result found in Hyd through exp is being

Can I do it with 30 people of male -

⇒ Can I generalize to lakh people? (in Hyd)

NS → Empiricism ⇒ positivism framework

Natural science → Empirical

✓ can do what we do in Hyd in Antarctica also if we have same conditions.

But socialists ⇒ can't do that

we are culturally, institutionally all diff structures of governance all different.

My experience with friendship is also determined by certain access of people

→ I am urban person

→ I am upper caste person

→ I went to certain school

Therefore it is STRUCTURED

Different structures → different experience off!

But a chemical in NS ⇒ not have structures diff.

isn't there objective?

People (two) → it is subjective #

Interpretation need to go on #

⇒ when a conclusion is drawn from 30 people

Interveing for 1 1/2 years

⇒ certain patterns we found are ⇒ Generalizable

⇒ but the specifics of what this group does → Can't be Generalized #

Ex: group of people: 'invented a logic' a person

x ⇒ ! to represent a persons in online

⇒ This might not done for entire hyd #

create their own words & using in keep on

* In friends group certain words create to represent & uses keep on ⇒ pattern Generalizable

⇒ K! → is used specifically ⇒ specific Can't be generalizable

Freedom of will free will ??

↳ without thinking about what thinking & doing

① How do I do what I need?

② How do others perceive me?

How others look at me?

How they accepted / dates?

⇒ we are in class → no free will

⇒ Already structured by institution #

free will

Should be out on instincts #

⇒ cutting creditcards:

Hiccomy ⇒ They are State of free will (Japan) but they can't

⇒ because they still need food by others to set food to them.

→ very difficult to understand

⇒ problem of having absolute free will is:

(there will be) No Accountability.

⇒ free will ⇒ does question of free will are / our choices, wills also structured by other like institutions !!

choices are so much
 ⇒ Ex: consumption of every kind
Social systems itself
 ⇒ As we become more & more embedded in the institutional
 structured logic of society

↓
 it's very difficult to resist it

Thus, it is very difficult to change it also

Ex: ~~Interreligious~~ Interreligious marriages are strong?

→ What does marrying in same religion serve?

→ Interaste why it matters?

It has reason

⇒ Hyd: in dhj ⇒ Has every kind of religion

⇒ None of them has time to practice the religion

⇒ They don't have time

⇒ Then, what is wrong in Inter-religion marriage?

⇒ I am going against a way socialization is normalized #

First question not about couple?

what is first question?

what → what is the religion of kid??

what ↓ because why it asked is

⇒ What is the socialization that your child is get from religion.

∴ Resistance is very difficult in this social systems #

Ex: Commodities

↳ product/service that is ~~product~~ exchanged for a value

→ can be Monetary can not be

Ex: coffee:

↳ most widely traded Agricultural produce of world #

⇒ sociological idea would be, ⇒ on the ground producing it and ask them → what will be experience?

⇒ what Agricultural worker of coffee says?? about experience??

⇒ they are going to talk about conditions of work where coffee is made which is

~~not~~ surplus ⇒ profit is made by somebody else

⇒ If they are not getting value of what they created #

→ They are agricultural labour #

→ couple? → what is coffee? (first date)

⇒ standard way to begin conversation.

⇒ it enables "socialization"

∴ it has tea stalls every Neighbours #

⇒ people don't love tea - People love conversation & only interaction with Tea/coffee.

→ It enables a conversation #

⇒ Ethical Consumption: all need to know? commutative

↳ people who are consuming

⇒ #

Ex: phone

⇒ This phone → itself

→ expensive

→ symbol of prestige

⇒ How this come into being? i don't know about it #

Ex: This knowledge that i don't know about is Commutative fetishism

↳ subscription made coffee consumption.

↳ tea coffee

↳ Ethical 7th nature

- morality of individuals not to do it?
- ① Free will → very difficult to get
 - ② Conditions where animals are kept & treated in extreme conditions
→ KFC, ...

The condition where these animals are kept is very huge.

As an ethical consumer, ~~it's a choice~~ it might be a choice of not consuming them.

⇒ How we tackle? very difficult ~~###~~

← Question KFC is difficult & problematic

- because
 - very powerful
 - power
 - global chain
 - supporters to political power
 - USA, UK,
 - war funders

⇒ individual making choice

↳ The movement has to be against these companies which produce from animals in extreme conditions.

This movement itself has face that resistance ~~is~~ X

→ Peter burger ⇒ chap 1:

Sociology of individual past time ✓ OK

→ Getting in → merit in league colleges

→ ⚡

Half dev of sociology

Max Weber & Karl Marx

Tinder (screen intimacy) ✓

Society in Technology #
