Society in
Technology #

L-3:

relationship btw The individual & state ?

This started #

→ French revolution

⇒ Industrial Revolution did that is

~~does~~ & it completely ~~is~~ revolutionary not in form of
Technology but in form of human relations. ~~is~~

How did people live before Industrial Revolution? messy?

There is 2 Modes of life:

① Merchantile Capitalism:

→ The people went from shores of Europe to other places of globe to do 2 things:

① TRADE

② To take of word God there

→ anybody other than them (they think) they are tribal identities & God believers

→ They have been required by cross!

→ Trade machines called Machinaries

Portugal:

Latin America
Portugal

→ 100 years to coast of Africa travelled

→ There is failure (not understanding) because they know Portuguese or Latin # (port knew English)

→ They say "Do you accept Jesus?"

but not understand

Language barrier

→ shock, Confuse & Shaking heads

Feudalism? other #

→ compare Indian Feudalism is wrong with European Feudalism?

Survive because there is notion of caste

→ No caste systems

* → feudal lords,

who own & command their power over

MANOR.

→ The people of certain caste

has to act like potters (~~Heads~~) (clients)

→ Generational in nature

it's a space

→ in front of MANOR there is huge castle #

then → build

That's where the person stays → The feudal lord

* The land in front of MANOR & around MANOR is called

FIEF #

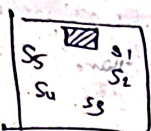

→ it is also called fiefdom

Kingdom →

larger aggregation of these fiefs

→ Each

No caste $\Rightarrow$ better the feudal relation was too strong

MANOR space of MANOR

agriculture field of manor

(Suf) S1, S2, S3, S4 S5

During time of harvest $\Rightarrow$ Need of extra labour was there

$\rightarrow$ At that time, free peasants comes to field

$\rightarrow$ hired from outside

$\rightarrow$ If the part of land B decided to sell by feudal lord

$\rightarrow$ The sub should will sold with the land

$\rightarrow$ There is Unique bond b/w person who tills the land & land itself

$\rightarrow$ If want to sell part of the $\Rightarrow$ 3 humans free with land
I will give

$\Rightarrow$ Not govern by caste

$\rightarrow$ It is purely economic obligation & dominance

$\frac{2}{3}$ rd of produce to give to lord

$\frac{1}{3}$ rd of for sustenance

$\rightarrow$ it moves to urban people in market

$\rightarrow$ a part of the harvest given to church as stipend

Therefore lot of movement of crops

Gold & etc because

(there is no universal currencies)

precious metals

no currency

crops

Now

$\Rightarrow$ what did industrial revolution do is?

Industrial revolution happened because merchantile / colonial

money started flowing into major cities.

$\Rightarrow$ In feudal system $\rightarrow$ There is No idea of Reinvestment

small profit only

No gain investment

$\Rightarrow$ They show

shows degeneration partial

Merchantile capital when it enters money from silk trade;
spices, Indian ocean route

$\Rightarrow$ we need to start investing

$\Rightarrow$ The first money goes to GILLS

a group of people with specific skill in common

Ex:
Jewellers
carpenters

Math

Marketing

Do software

and off

$\rightarrow$ Every cities have GILLS

if i want to be a carpenter $\rightarrow$ need to register in gill

* No money given

* only food & free training

(like Awanti)

$\rightarrow$ Then get own jobs around space

inverted in gill

$\rightarrow$ lead to immense of discoveries $\Rightarrow$ Technical discoveries

like steam engines, spinning genny

$\rightarrow$ All inventors are part of a GILL

only a subject

$\Rightarrow$ These discoveries are "people made"

people's real

with this skill $\rightarrow$ industrial

revolution

happens (sometimes else)

$\Rightarrow$ In fiefdoms & on feudal manors $\rightarrow$ everyone living with isolated lives.

I am attached to lord 1

I am attached to lord 2

} we don't get to speak much

potato X bigger famine $\Rightarrow$ all potatoes are dangerous

$\Rightarrow$ people don't have food to eat

$\Rightarrow$ All states in ...

oxford (4)

Orthodoxy

study of bible & other holy texts

② Basic Maths

③ Astronomy

④ Ethics

All phychem met

NS

MS

→ opened but not much there because they are habitual to live in feudal lands of feudal day of living

At now, shop floor started together where work happens Now cubicles

Started going to industries & as unskilled workers → & learn skill fast

Here what happened is for first time; 1000's of people are working in same space and united to lord

∴ Started, Notion of wage started

August Comte's:

① The private/personal life is different from shop floor

Single day → found multiple places & socialize in multiple areas

They believe → a "Divine Intervention" behind by will of God → every justification is in name of God

it is blessed

→ something can't be proved

→ it is faith & belief

So people (feudalists) thought to the separate like retributed where hundreds of gods there no intervention

→ Mechanisation → did there is no need of much people in Agriculture → reduce people in Agriculture

What is Modernity? (antithesis of society)

"Modern"

→ it is a mass space spans across space & time

→ introduce to socialists (Marx & others)

→ Industrial revolution

→ relay → phone (connecting without being in same space)

→ multiple phases of development errorless

→ change of family structures

→ change of State (not in Europe (there))

In India: ⇒ colonised

Kepler, Galileo, Newton → first time questioning God

→ emergence of Scientific Method

→ science is different from religion

→ no need a religion to understand natural world

Further, when people want to know something, they didn't have methods

European Enlightenment & Scientific revolution: Kepler, Galileo, Newton, Copernicus

→ emergence of "Scientific Revolution"

→ evidence, observation, experiment, hypothesis, measurement

→ erosion/reduce in the influence of faith & religion

→ New ways of thinking, producing knowledge

* primitive Accumulation

→ They take coal out of land for factories

→ They force people to grow INDIGO

→ work, slave → enslaved by power

Colonisers: collecting for profit

∴ South Asia & India all get to Capitalism due to colonisation

How to power? → power already went from "God" → "King"

God X

democracy X → royalism other people needs without culture, no book of rule

→ sent anthropologist → told to learn language #

→ Mode of production changed # feudalism changed

(Slave mode of production)

Feudalism

feudal → Capitalist

Manual scavenging:

→ Drains "gusting"

→ exposed

→ Illegical & ohhoo!!

→ Why don't we have this technology??

→ why not these!! ⇒ ① cost of labour is very cheaper than machine

→ somebody dignity can be compromised as machine #

② People who engaging in Manual scavenging also don't want to stop

(why?)

because they aren't getting no jobs

→ lowest & lowest caste jobs #

we are not in perfect capitalism

Rise of Industrial revolution

→ structural change in economy:

→ lesser role of Agriculture (due to Machinery)

→ More Industrialization & Commercialization

→ Use of new sources of power, which revolutionized production

→ shift to large-scale manufacturing

→ Technological Innovations

→ changed human relations

→ Rapid urbanization W.Y. → 36,02,26

→ Break of Feudalism

→ People started working together

→ changed Mode of production

→ family structures changed

→ class structure changed

Rise of

→ why is relation ship b/w "Me" (Individual) & God is related to this church? #

→ If I am paying tax → I am doing my religious practice

Relationship b/w someone & I I am giving something off

Why it is like that? B/w "Me" & "Partner"

Why there is a broker?

Who is Catholic?

→ The church has no role in relation b/w person & God #

→ Church has no role on it!!

→ can't ask for taxes / paying

→ it is not by exclusion in Christians / church people

will yes half No. X

The protestants are state people heads → because of (State power) power of the church

→ It challenges State power #

→ Nation of Individual started • no catholicist need

& relation of individual & others #

Class & caste → came from born

Calcutta

→ How

→ choices & decisions required importance

→ Rise of Protestant Church

→ Decline of Catholic Church ☺

→ Interpret word of God

Catholic → control over both spiritual & political

∴ challenge came from state about Catholic

Protestantism started to set user / personal relation with God directly without needing a priest or church

→ In feudal societies → people's social posⁿ mainly inherited
 farmer → farmer's son → farmer ✓
 But it changed to acquire status
 → due to rise of individualism
 → choice making & decision making
 → with efforts, talent, skill → social posⁿ consequent
choice & decision
 → People can make their destiny
 → Experience their needs #
 6/26 → I doubt

Development of sociology in India: I, II & III 7/26

I: Colonial Modernity and Anthropology:

→ This colonial modernity
 → comes with idea West is superior in civilization
 → They have the best product → Democracy #
 * Democracy → all to make Modern OK! baane india
Save chandrabhaskar
 * Superiority of Western civilization

Capitalists → don't want democracy
 because Democracy says all are equal before
 law, by justice, social etc

brimma:
 → They are scared & lived with a lot of caste
 → no evolution is very hard/difficult to do going
 → therefore only no questioning from marginalized castes
 againstly #

→ Sending people (Anthropologists) → to document human life

* Hindu majority:
 ∴ Goes to Pandit (Brahmin) → what written in your book
 if someone steals something?

→ The rule (Vedas) for first time he will be beaten up with
 stick

→ Religion gets modernisation when & modernisation in English
 when the language changed to ENGLISH #

→ Thus, when laws are governing
 these boundaries can be broken, class boundaries can't
 → all judges of supreme court 1985-1: very privileged
 backgrounds #
 → The problem is the lot of people doesn't lived experience of how
 & what most part of India function
 → lot of us also don't have it

colonial power saying → bring all Hindu & Muslim text & make it
 look Modern #
 (TRANSLATION)

1857 → day
 → If someone says I will rule → stone throw
 white lady going → throw cow dung on head
 → showing up power #
 Challenge power

→ The problem with tribes → is not problem of Britishers
 It is problem of Indian upper class & upper caste #

alive very near → They come & look #
 looking landowners

→ Landowners also exploiters
 Exploiters demand & challenge & hit back
 ∴ That's why criminal tribes coming across Dandupalem

People from certain place
 born by certain race (caste) (colour) are criminal by
 BIRTH

 Exotism (or) NIOD
 sacred & Marginalized view

Mohun Prasad - Indian political leaders

Lecl

⇒ You are always down in drain and how you would you know what is society & why society is like that #

wild dogs
Hyena
Pain river car

→ all dangerous but not kill because idea of villages is the killing of these animals
↓ leads to
destruction of four cattle

Angars:

is me migration

→ bringing notion of race

→ Angars are race of people coming from Europe/India & getting & driving locals. If they are lower castes #

Anthropometric method: ⇒ proper is to build Ideal man & Ideal women

Jesus

→ not look like the photograph

Western European

→ comparison

→ Jesus → not look like

→ like Hero

⇒ created in the ideal MAN #

East of India

Stock

Identification & distinction b/w 'castes' & 'tribes' #

The idea of Stock / race is used to divide #

Ex: Forehead width

Differentiations entire in

Institutionalized

Reverence

Indology

Study of societies through 'scriptures'

→ Benefited the Brahmins, who held monopoly over possession, access & interpretation of Scriptures

⇒ Sociology / Anthropology came to reproduce the knowledge of Brahmins who were given privileged status of 'Indigenous Intellectuals'

Indological approach ⇒ rationalise hierarchy of castes

① Brahmins, Kshatriyas, Vaishyas, & Sudras

= but one of these four ⇒ untouchables (Dalits)

Brahmins
↓
Kshatriyas
↓
Vaishyas
↓
Sudras

It seems to us

Biblic Britishers

⇒ dominant

⇒ case in certain region

⇒ who have high amount of resources

⇒ note ⇒ Yadavs

⇒ lot of land

⇒ dominant

⇒ something conveyed to others in

language. I speak & I understand

⇒ No body else that power

other person

lot of land

lot of money

lot of skill

because I am an educated person

I have the power

shape the society is & how #

⇒ Bombay schools

⇒ then there's

this freedom struggle

is not complete

⇒ it is just transfer of power

from white → Brown skin

feudal lords & Britishers → both are exploiters
 Congress not saying that X ohhoo!
 → at same time, if it comes to us we can imagine the path
 of world very diff way
 → not going to behave like them (British)
 → our Morale & Affairs are different
 Indological approach → These people who are colonizers they are
 always strategists #
 Dominant caste → who have availability of resources
 → in region which has coal high amount of
 resources
 North belt ⇒ caste of YADAV → lot of resources → Dominant caste #
 ⇒ Brahminial view of life
 Britishers idea of lets flatten the remove
 ⇒ It makes easy of their Governance
 ⇒ Normalized Brahmin power, Undermined other sources of
 power (basin on region, village etc)
 ⇒ caste & tribes placed hierarchically
 ⇒ caste thus become "essence" of Indian society &
 civilisation.
 why & How much Imp education? (before 1947) #
 I have power to shape society
 → Bombay School:
 ↳ idea in India & ~~disturb~~ disturb & show place
 ↳ trying to understand by lens of HINDU
 civilisation
 Gopal, Tilak was there (Bombay)
 Lucknow school:
 ↳ do not identify Sociology as Anthropology

why → Because
 → not interaction in cities
 ① Srinivas & Desai
 save that caste idea of caste is not a Hindu
 phenomenon only #
 → Islam (same as caste)
 Globalisation
 ② pos Subaltern studies
 → men people after them out from marginal
 pos
 → women form marginal caste & class
 Advertisers writers etc market writing
 Just stories #
 May sociology works so needs to change?
 as a discipline ps, library it is discipline gives
 claims to space for multiple voices #
 Genre Story:
 Sociology → lot of infighting
 → not everyone is studying same,
 political, Economical, Sociological
 ⇒ Triple Talak debate:
 Muslim man - TALAK
 TALAK
 TALAK
 ⇒ a muslim man in his saying to women three times TALAK
 saying TALAK, TALAK ⇒ DIVORCE happens
 & angry with Allah → TTT
 ⇒ Not practiced everywhere #
 * Civil courts study
 ⇒ people say, wife say he said triple talak
 man → I am drunk & said Talak

Women → He said, I will leave him. (run away)
 Effects like objectified, marginalised
 L1 looking from lens of EXOTICISATION
 200 cases divorce → 2 of them type take → done by MEDIA
 → no body has ever more than one wife
 → notion of power
 → PS → political sociology
 → nation & power
 He does monetary value & not only value economic
 → Gift Giving, promises etc.
 also part of economy
 India & IRAQ promise how value establishes
 oil now
 → many later

Ly: Social action
 Basic unit ⇒ Neutron
 Society is composition or aggregation of lot of social actions.
 Ex: of social action:
 Brushing → a social action
 daily
 It is social because it is an expectation of audience in front also
 Social Action is by definition is always meant by somebody
 Social Action → Multiple types
 we can judge using rationality / reasoning for those
 Action is considered social when the individual acts with intent to influence the behavior of one or more persons

→ Social action: basis
 social actions that actions → can be differentiated on type of intention / reasoning they convey
 Elements of social action:
 (i) social action encompasses / consists all forms of human behavior
 ∴ can study many human behaviors
 → if certain point of time → seen dream → it may effect tribe / individual
 ⇒ myth making ourselves
 ⇒ saying that ⇒ "make your money work when you sleep" → stock market consumer
 Stock market
 → crashing ⇒ it's not growing
 ⇒ Modern myth tell the
 ⇒ Social Actions is much broader
 (ii) social action involves assigning a subjective meaning to behavior
 Ex: Idea of DATING
 → Social Action
 (iii) The individual / individuals acting consider the behavior of others
 Mutual Forces There are → enable / limit our behavior
 (iv) social action is directed toward a specific goal.
 Social action Theory:
 (i) Society is construction of the interactions & meanings of its members.
 → it depends on human behavior & meanings they embedded in institutions.
 Interpretivist:
 → when I am thinking of what meaning
 → Sati still practicing
 → why are you doing sati?
 → what it is giving you?
 Classification might be religious, ceremonial, political etc
 ⇒ That is part of truth

→ take these data & response & analyze it & interpret something meaning ##

Co-construction of knowledge

Situation is imp

layers → ① done by social & subjects →
→ ② subject comes #

fracturing empathy to understand meaning & motives

people's actions #

No empathy

→ start like
→ Indian etc as lab mice #

sociologists, theme, women, rapists

School
hang out

↓
empathize with them

→ Every body of that class is like that
→ Unique case → can't generalize #

→ to study you can't be there to study

four kinds of actions:

- ① Instrumental rational action, zweckrational
- ② value rational action, wertrational
- ③ Affective action
- ④ Traditional action

zweckrational

→ all of these actions get differentiated by

type of rationality they arise.

* society is mixture of all types of these rationality #

① zweckrational action: Goal driven

Actor conceives his goal clearly & combines means to attain it

→ Rationality defines in terms of knowledge of Actor.

Ex: Engineer building a bridge

Goal driven

↓
Actor conceives his goal &

combines means to it

→ terms of knowledge

→ it takes about INDIVIDUAL #

② Value rational action:

Goal is to remain faithful to his own idea

→ means an action is based out of value you hold

Ex: → I will fail in exam but I won't cheat

→ Captain of ship going down of ship #

→ they are tied to certain value sinking ship is dishonorable #

Script not change
Memorization

if they not got
inspire

any means to reach

Ex: Downy → value driven

→ value that somebody follows life on

→ western movie in certain way → effected by action #

Downy → love, money

→ taking & saying it's fate's choice

He lying, because he thinks he deserves it

his aim → money getting goal

So take

Instrumentation is there #

Ex: local couples → interreligious & intercaste → no marriage

Breakup → because not allowed
Instrumental Traditional rationality

③ Affective Action: Dictated by state of mind
→ emotional reaction of actors overpower (affective orientation emotional)

Ex: mother slapping child #

child is born → no idea of fear

→ poverty gives idea of fear ##

④ Traditional action: Dictated by customs & beliefs

→ obeying to certain rules & norm due to conditions #

Ex: Greeting with folded hands

Weber in Iron Jail:

- He sees Traditional value rational & affective reason
- If Capitalism goes on → with the force growing what we have is only Instrumental rationality will stay.
- Then human only think about how to maximize their chances & opportunities #
- Everybody → Social #
- Other rationalities will go down #

Idea of efficiency → only going to judge somebody

Predictability → are part of Instrumental rationality

EXAM 2105 (or) TEE

lot of people think → you end up with social killer to reduce competition

Karl Marx: → Instrumental attached to it
→ Alienation is "only I want to win"

→ To be human → To be conscious

Human's are conscious: they can manipulate nature & they can create own substance

→ Cutting trees & putting drivers → for Agriculture
→ exploiting/manipulating nature

→ for subsistence #

→ This knowledge system produced and passed on across generation

Objectification (vs) Alienation:

→ itself means when we consider categories diff from ourself (us).

→ Human from being different from others #

Human has skill & they can manipulate nature which is object #

∴ it is objectification

→ Humans had to do objectification for lot of things to produce any form of necessary value #

Alienation:

→ The idea of Alienation is given the man/woman is part of society for them it is not visible what are special relations which are required for any kind of production.

→ RICE/wheat → rice comes from big basket #

→ In doing this, we paying

Alienation

→ Alienation of process happened #

→ Alienation exists throughout the society #

→ Reduction of social relations into market exchanges
→ Skill to game & work process

→ first entire chair/table start → end we only do #

now in capitalism → No skill using #

→ Alienation of labour

labour → stand in point A & your work is like a single screw in that chair

→ repetition of same work

→ Will forget/let lose his skill

→ forget skill of making chair #

→ Management oversees this process → called Division of labour

→ Quantification & happening

no skill using

→ How many screws a fixed no.

→ Marx derived concept of "Alienation" from Hegel

Hegelian alienation is conceived on philosophical or metaphysical

→ In Hegelian conception → The spirit, Geist is itself alienated by its works #

→ Marx → Materialist
spirit, Geist → Alienated by body ??

It's not simple in capitalism

→ Acc to Marx → people before
Absolute Alienation → Mass Alienation happened by Capitalism

not saying no Alienation before

Criticizing the present social / society, Economy & politics

→ Existence of Alienated state is far beyond idea of freedom

Acc to him → The base is Economy & there is superstructure

↳ Alienation is Economic in Nature

Western thesis:

Difference is: it's just not economy

→ Acc of Capitalism came because there is reformation

↳ takes place & it brought called "protestant ethic"

↳ traces Rise of Capitalism to Religion

~~Capitalism~~

In this capitalism:

The problem is The work doing by person is

↳ Inherently doesn't give satisfaction

↳ production of work he doing

↳ He can't find a any scope of Creativity

he is assigned regular work

↳ repetitive work

→ No value giving for work

→ No wage

→ No qualitative value from Hand

Capitalists also Alienated by process of production

↳ he doesn't know what exactly, where happening

↳ informed decisions

→ Quantified

Ex: Handloom → not need struggle

bedhi movement: don't more Alienated

→ imp to be creative

filled process involve

Alienation → sociologically interpreted

→ is at once historical, moral & sociological Critique of present social order

In capitalism → root of Alienation is Economic Alienation

man → is a creature who works
if he works under human condⁿ
he is dehumanized

→ In capitalist economy, production doesn't help man

realize his TRUE POTENTIAL &

causing Alienation of skill & value

↳ Instead of work → expression of man

→ work has been degraded into an instrument

↳ All entrepreneurs themselves are in Alienated

because, the commodities do not answer needs which

are truly experienced by others

but put on market in order to produce profit to

entrepreneur.

biggest probm → funding

↳ version of app came

↳ Biggest problem is FUNDERS

↳ need to ask permission from who taking money

The analysis of capitalist economy was

Analysis of economy individuals & collectivities having

control over their own existence in system to

autonomous laws

↳ Alienation → Man's own deed becomes an alien power

opposed to him

which enslave him instead of controlled

by him

ex:
 ① Man & his producing activity:
 → Labour is external

→ Labour
 → Idea of labour
 → Labour power

Labour power: maximum capacity of labouring in a day & (in a period)

→ for company, they want to use labour power

They want to extract → more labour power

→ more working hrs

→ The worker doesn't feel content with working

Division of labour & repetitive task allocated

→ which makes worker not to reach full potential

rep over, over some work

→ Due to repetitive task, there is no control over process of production

become

① Far away from end product.

② I am just here, I am doing, I didn't know what I am contributing

Ex: what does a fixing a screw means?

then, No idea about another person

→ Capitalist want more labour power hrs of work profit

① Man & his product:

→ Each contributing labour power to product

→ Man is alienated from his product

① we are working only on one task repeatedly
 ∴ No idea of product

② product he/she produces, most is mostly not affordable by that person

NOT AFFORDABLE

part of task

feudal → rice produce
 → at least can eat rice

in now capitalist → don't control chips

↳ can't buy X & use X

Labour becomes an object but it exists outside him
 product becomes a power on his confronting him

→ Product controls the MAN

Example

Silicon

chip made

Articles of consumption have power over alienated from product

Who mine silicon? he/she never been know

what happened

→ He has to be do

∴ Man has alienation from product

can't buy also

② Man in relation with other men:

if product doesn't belong to worker, becomes alien to him

→ it is belonging to someone else than worker

→ this means product is owned by someone else

No money → go & person ask bag of rice

only doing work for survival

→ No control → No good wage → No relation with person

② & product

③ Man & his species:

Dependence on other is higher

→ devalued skill → no need to skill

Example

feudal → suff

at least can survive

→ if I want carpenter → I want skilled carpenter to make chair

→ now A → B → C → D

④ → fixing screw ohh!!

no creativity needed

he/she $\rightarrow$ capabilities $\times$ man & his species $\#$
alienated

Alienation $\rightarrow$ exploitation:

What is added value to product?

Raw materials

Wood $\Rightarrow$ Add up raw materials
metals $\rightarrow$ screws $\Rightarrow$ it makes value??

Human worked on it $\Rightarrow$ is making value $\times$

No adding up

$\therefore$ Labour power imp

$\therefore$ without Labour No value created $\#$

~~Star~~ Change you getting Exploiters getting high much:

$\Rightarrow$ We don't know real cost of our labour $\#$

$\Rightarrow$ we don't realize our skill & its value $\#$

using our skill $\Rightarrow$ capitalists/owners making profit &
Surplus for them $\#$

~~Star~~ $\therefore$ Due to Alienation

The chance of exploitation keeps on increasing $\#\#\$

Exchange value of Commodities

(vs) labour wages

$\rightarrow$ less wages

but using skill get more profit

~~Star~~ Sundar pichai $\rightarrow$ salary

less than his value

(his deserved value)
