

Women → He said, I will leave him.
(run away)

→ feels like objectified, marginalised

→ looking from lens of EXOTICISATION

700 cases divorce

→ 2 of them Tripe talak
→ no body has ever more than one wife

done by media

thought
die to multiple
wives

→ notion of power

→ PS → political sociology

→ nation & power

He done → monetary value & not just only value economic
done &

→ Gift Giving, promises etc &

Also rest of economy &

India & Iran & promise

how value circulates

oil now

→ money later

Ly:

Social action

brain → study

Basic unit → Neutron

→ Society is composition or Aggregation of lot of social actions.

Ex: of social action:

Brushing → a social action
daily

It is social because it's an exception &
audience in front also &

Social Action is by definition is always meant by somebody

Social Action → Multiple types

→ we can judge using rationality / reasoning for those

* Action is considered social when the individual acts with
intent to influence the behavior of one or more persons

→ Social action basis for sociological theory

* Social actions that actions → can be differentiated on type of
rationality / reasoning they convey &

Elements of social action:

(i) Social action encompasses / consists all forms of human behavior

→ can study many human behaviors &

* → if certain point of time → seen dream → it may effort to be / individual

→ myth making ourselves

→ saying that → "make your money work when you sleep"

→ stock market consumer

Stock market

→ crashing → it's not growing

→ Modern myth tell the

→ Social Actions is much broader &

(ii) Social action involves assigning a subjective meaning to
behavior & Ex: Idea of DATING

→ Social Action

→

(iii) The individual & individuals acting consider the behavior
of others &

structural forces There are → to enable / limit
our behavior &

(iv) Social action is directed toward a specific goal.

Social action theory:

(i) Society is construction of the interactions & meanings of its
members.

→ it depends on human behavior & meanings they embedded
in institutions.

Interpretivist: & for

→ when I am thinking of what meaning

→ hypothetical: Sati still practicing

→ why are you doing sati?

→ what it is giving you?

Qualification might be religious, economic, political etc

→ that is part of faith

→ takes these data & response & analyze it & interpret something meaning ##

situation is imp

Co-construction of knowledge

2 layers → ① done by social & subjects → ② for collect times

→ practicing empathy to understand meaning & motives

people's actions ##

No empathy → fast lee → Indian etc as lot nice

Sociologists: theme → women rapists

→ Every body of that class is like that

→ unique case → can't generalize

→ to study

four kinds of actions (social)

- ① Instrumental / rational action, zweckrational
- ② value rational action, wert-rational
- ③ Affective action
- ④ Traditional action

→ all of these actions get differentiated by type of rationality they arise.

Society is mixture of all types of these rationality

① zweckrational action: Goal driven

Actor conceives his goal clearly & combines means to attain it

→ Rationality defines in terms of knowledge of Actor.

Ex: Engineer building a bridge

Goal driven

Actor conceives his goal & combines means to it

→ terms of knowledge

→ it talks about INDIVIDUAL

① instrumental / value rational action:

Goal is to remain faithful to his own idea

→ means an action is based out of value you hold

Ex: → I will fail in exam but I won't cheat

→ Captain of ship going down of ship

they are tied to certain value sinking ship is dishonorable

Ex: Downy → value driven

→ value that somebody's actions life to

→ western movie → effected my action

Downy → love money

→ taking & saving it's future's choice

→ lying, because he thinks he deserves it

his aim → money getting goal

So take Instrumentation is there

Ex: for couples → Interreligions & Intercaste → No marriage

Breakup → because not allowed

→ Traditional rationality

③ Affective Action: Dictated by state of mind or humour of subject

→ emotional reaction of actors overpower

Ex: mother slapping child

child is born → no idea of fear

→ society gives idea of fear

④ Traditional action: Dictated by customs & beliefs

→ Obeying to certain rules & norm due to conditions

Ex: Greeting with folded hands

Ueber in Iron Jail:

- He seeing Traditional value rational & affective reason
- ⇒ if capitalism goes on → with the force growing what we have is only Instrumentation rationally will stay #
- Human only think about how to maximize their chances & opportunities #
- Singly → Social #
- ⇒ Other rationalities will go down #

Idea of efficiency → only gives to judge somebody

Predictability → are part of Instrumental rationality

EXAM 210s (or) JEE

lot of people → you end up with serial killer to reduce competition

Karl Marx:

⇒ Alienation

→ Instrumentation attached to it
is "only I can win"

→ To be human → to be conscious

Human's are conscious: they can manipulate nature & they can create own substance

⇒ cutting trees & cutting rivers → for Agriculture

→ exploiting/manipulating nature

⇒ for subsistence #

⇒ This knowledge system produced and passed on across generation

Objectification (or) Alienation:

→ itself means when we consider categories diff from ourself (us).

→ Human from being different from ourselves

Human has skill they can manipulate nature which has its object #

∴ it is objectification

⇒ Humans had to do objectification for of times to produce any form of necessary value

Alienation:

→ The idea of Alienation is given when the man/woman is part of society for them it is not visible what are social relations which are required for any kind of production.

→ Rice/wheat → we come from big basket #

Alienation

→ Making by giving, we paying

→ Alienation of process happened #

→ Alienation exists throughout the society #

→ Reduction of social relations into market exchanges

→ Skill in game & work process

→ First entire chair/table start → end we only do #

now in capitalism

→ No skill using #

→ Alienation of labour

labour → stand in point A & your work is like a single screw is that chair

→ repetition of same work

→ will forget/set, lose his skill

→ forget skill of making chair #

→ Management overseeing this process → called Division of labour

⇒ Quantification & happenings

no skill using

⇒ How many screws are fixed up.

⇒ Marx derived concept of "Alienation" from Hegel

Hegelian alienation is conceived on philosophical or metaphysical level

⇒ In Hegelian conception ⇒ The spirit, Geist is itself alienated by its works #

⇒ Marx → materialist

spirit, Geist ⇒ Alienated by body ??

It's not simple in capitalism

Free to Marx → people before

~~Absolute~~ Alienation → Most Alienation happened by Capitalism
not saying no Alienation before

Criticizing the present social / society, Economy & politics

⇒ Existence of Alienated state is far beyond idea of freedom

As to him ⇒ The base is Economy & there is superstructure

↳ Alienation is Economic in Nature

Marxian thesis:

Difference: it's just not economy

⇒ Rise of Capitalism came because there is reformation

takes place & it brought called "Protestant Ethic"

traces Rise of Capitalism to Religion

~~Capitalism~~

In this Capitalism:

The problem is The work doing by person is

→ Inherently doesn't give satisfaction

→ production of work he doing

→ He can't find a any scope of Creativity

he is assigned regular work

→ repeatable work

→ No value giving for work

→ No wage

→ No qualitative value from Hand

Capitalists also Alienated by process of production

→ he doesn't know what exactly, when happening

→ informed decisions

→ Quantified

Ex: Handloom → not need struggle

but movement: don't more Alienated

→ imp to be creative

skilled process involve

Alienation → sociologically interpreted

→ is at once historical, moral & sociological Critique of present social order

In Capitalism ⇒ root of Alienation is Economic Alienation

Man ⇒ is a creature who works

if he works under human condition he is dehumanized

⇒ In Capitalist economy, production doesn't help man

realize his TRUE POTENTIAL

Causing Alienation of Skill & value of

⇒ Instead of work as expression of man

→ work has been degraded into an instrument

⇒ All entrepreneurs themselves are so Alienated

because, the commodities do not answer needs which

are truly experienced by others

but put on market in order to produce profit to entrepreneur

biggest probm → funding

let's version of app came

Biggest problem is

FUNDERS

need to ask permission from who taking money

The analysis of Capitalist economy was

Analysis of economy individuals & collectivities having

control over their own existence in system to

autonomous laws

Marx

→ Alienation

Man's own deed becomes an alien power opposed to him, which enslave him instead of controlled by him

ex:
 ① Man & his producing activity:
 → Labour is external

→ Idea of labour
 → Labour power

→ Labour power: maximum capacity of labouring in a day & (in a period)

⇒ For company, they want to rise labour power

They want to extract ⇒ more labour power
 → More working hrs

⇒ The worker doesn't feel content while working

Division of labour & repetitive task allocated

⇒ which makes worker not to reach full potential

rep over over some work
 ⇒ Due to repetitive task, ⇒ There is No control over process of production

because
 ① Faraway from end product.

② I am just here, I am doing, I didn't know what I am contributing

Ex: what does a fixing a screw means??

then, No idea about another person

⇒ Capitalist want more labour power hrs of work profit

① Man & his product:

→ Each contributing labour power to product

⇒ Man is Alienated from his product

② we are working only on one task repeatedly
 ∴ No idea of product

③ product he/she producing is mostly

not affordable by that person

NOT AFFORDABLE
 → Part of task

[3m feudal]

in now capitalist → doing computer chips

⇒ can't buy X & use X

Labour becomes an object but it exists outside him

product becomes a power on his confronts him

⇒ Product Controls the MAN

Ex: Articles of consumption have power over Alienated from product

Who mine silicon & he/she never been know what happened

⇒ He has to be do !!

⇒ ∴ Man has alienation time with product

① Man in relation with other men:

if product doesn't belong to worker & becomes alien to him

⇒ it is belonging to someone else than worker

⇒ this means product is owned by someone else, ##

No money → go & person ask bag of rice

only doing work for survival

→ No control → No good wage → No relation with person

② Man & his species:

Dependence on other is higher

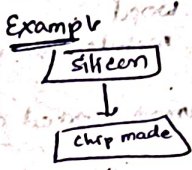

⇒ devalued skill → no need to skill

if i want carpenter → i want skilled carpenter to make chair

→ now a → b → c → d

⑤ → fixing screw ohhoo!!

No creativity needed

② & product

example
 Feudal → suff

at least eat survive

he/she → capabilities X man & his species #
Alienation

Alienation → exploitation:

What is added value to product?

Raw materials

Wood → planks
metals → screws
⇒ Add up raw materials
⇒ it makes value??

Human worked on it ⇒ it makes value X

No adding up

∴ Labour power is
∴ without labour No value created #

Change you getting Exploiters getting high much

⇒ We don't know real cost of our labour

⇒ we don't realize our skill & its value #

using our skill ⇒ Capitalists/owners making profit &
Surplus for them #

∴ Due to Alienation
The chance of exploitation keeps on increasing ###

Exchange value of Commodities

(vs) labour wages

less wages
but using skill get more
profit

Sunder pichal → salary

less than his value

(his deserved value)

Marx already criticized idea of 'spirit' from Hegel

⇒ I believe that capitalism has come into force first in
because of a protestant ethic Europe

which creates centrality of what
Capitalism is #

Reformation → movement in 16th century Europe

Where people of Europe speak different languages

Church & monarchy at same level ###

There is divine power from church

& moral power from king (monarch).

one time

2 parallel system

⇒ People say King & people say not to place church equal

to monarch

⇒ Need to take power of from Monarch

King has to group & religious to down

(Monarchy)

(Church)

∴ Catholic church questioned here ###

⇒ kill somebody and they are selling Indulgences

pay some fine/tax

⇒ your sin is gone #

"Faith & faith alone is enough"

(no need of middle person btw god & individual)

⇒ No need of priest (or father) #

acc to King Martin Luther only one true Father/priest

Martin Luther "faith & faith alone" → no need broker

⇒ only one work the priest/middle person has

↳ that is to help you in Ceremonies (prayers)

Father/priest ⇒ master of Ceremony

Ceremonies

All the king doing because he wants to new type of

Christianity # to come on earth

→ There is power struggle #

Converts BIBLE Latin → German

like Bible was Latin language only known by some

⇒ German → German language

You can read / access

→ Get bible into normal language

→ self interpretation of each with god #

→ No middleman ☺

Feudal → profit

→ king

→ church

→ Carry in form of gold, crops & precious metals #

→ No currency.

* How it is like contribution should be Will of individual #

ex: 2 rupees to church ✓

100 ✓

→ it can't be like a tax to pay must

XX No need

⇒ chosen

→ The constraint removed to pay this much #

John Calvin: Calvinist

① → Everything is pre-destinated #

↳ Can't buy our way / future

→ Can't pay church so that we can go to Heaven #

• due to this statement church loses power #

→ There is a shift Economic Traditionism to Economic Rationalism

Traditionism itself → you work need to because

↓

You need to pay to church #

Rationalism: 1) production process, surplus, science

all req church removing power #

if they say Hell for sure

↳ why work to do?

↳ sin more? basu

→ New kind of religion need

✓ non-new X

No buying / even you can buy your #

→ Acc to Weber → all this tied back to lead to CAPITALISM #

① Protestantism: There exists an absolute, transcendent God

② Give human beings working

the money & circulation of capitalism is

profit

↓

Reinvest

③ Mon obliged to work for glory of god

④ ⇒ Re-invest of profit

⑤ → consumer desires, frugal lifestyle

⑥ →

↳ If business growing → you

It is indication of God giving → you are going to heaven

⇒ you are cycle follow → X

→ personally ⇒ Business growing → You are God's chosen one #

→ Instrumental rationality comes in #

1 → peter berger → chap 1

2 → Getting in → gear ()

3 → screen intimacy → ()
